## Foreign Agricultural Trade of the United States

March/April 1983

## NOTICE

Your subscription to this publication may be due to expire soon. If so, you will get a card in the mail from the Government Printing Office (GPO) notifying you and inviting your renewal. It's the only notice from GPO you will receive about the expiration. To assure uninterrupted service, return it promptly with your renewal check.

## SUBSCRIPTION INFORMATION

Foreign Agricultural Trade of the United States is available on a subscription basis. Six reports and two supplements are published annually. Subscription rates are \$19 domestic; \$23.75 foreign. Send check or money order payable to "Superintendent of Documents" to:

Superintendent of Documents  
U.S. Government Printing Office  
Washington, D.C. 20240.

## Agriculture in China...

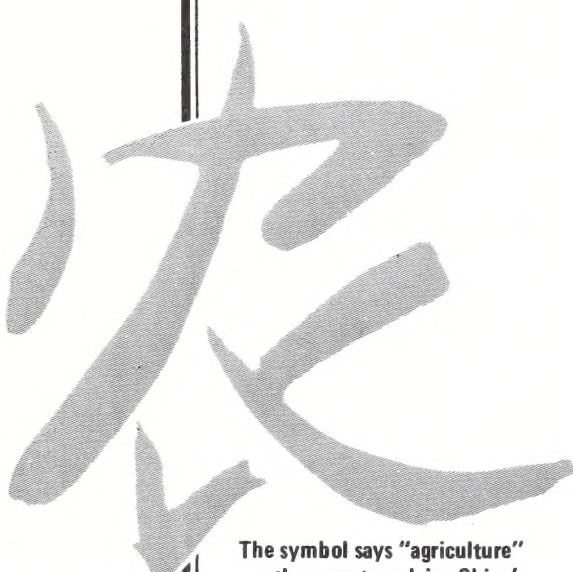

"U.S. business executives rivet their attention to stock market activity, prices, and interest rates, while their Chinese counterparts look for annual production and procurement plans, control targets, and administrative orders..." (Francis C. Tuan and Frederick W. Crook, authors of the new report, Planning and Statistical Systems in China's Agriculture, \$5.50, 100 pages, FAER-181.)

Planning is at the heart of the Chinese agricultural system. This Economic Research Service report is a comprehensive description of how the Chinese have gathered their farm data and used it to plan production in recent years.

This new report on China is excellent background on a budding agricultural market for U.S. goods. Because of high domestic demand, China is an important purchaser of grain, oilseeds, and fibers—major U.S. export commodities.

To order Planning and Statistical Systems in China's Agriculture (FAER-181) GPO stock No. 001-000-04329-3...

Write to Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Make your check or money order for \$5.50 payable to SupDocs. You can charge your order on VISA, MasterCard, or with a GPO deposit account; call GPO's order desk at (202) 783-3238. Bulk discounts available.

The symbol says "agriculture" ... the report explains China's agricultural planning and statistics system ... the country means more exports for U.S. agriculture.

October-March Exports Down 17 Percent (see p. 1). U.S. agricultural exports totaled \$18.1 billion during the first 6 months of fiscal year 1983, 17 percent less than the previous year's value. Sluggish grain shipments in the October-December 1982 quarter caused most of the decline.

October-March Imports Rising with Economic Recovery (see p. 30). U.S. agricultural imports in the first 6 months of fiscal year 1983 rose 5 percent above those of the same period last year to \$8.1 billion, primarily due to increases in coffee, cocoa, meat, fruit, vegetables, and beverages.

U.S. Agricultural Exports to Canada Decline in 1982 (see p. 52). Canada is among the largest foreign markets for U.S. agricultural exports and one of the leading import sources. Farm product exports to Canada reached a record \$2.1 billion in 1981, followed by a drop to \$1.8 billion in 1982. Canadian agricultural exports to the United States, meanwhile, rose steadily to \$1.7 billion.

U.S. Agricultural Exports by Region and State, Fiscal Year 1982 (see p. 57). Illinois and Iowa derived more than \$3 billion each from agricultural exports in fiscal year 1982, followed by California, Texas, and Minnesota. Ten States accounted for about 55 percent of U.S. farm product exports.

U.S. Agricultural Exports Under Government-Financed Programs Decline to \$1.3 Billion in 1982 (see p. 69). Concessional agricultural exports under Government-financed programs in calendar year 1982 fell 9 percent to \$1.3 billion, with declines in Public Law 480 Title I sales and Title II donations. However, Agency for International Development disbursements rose to \$144 million. Egypt was again the major recipient of concessional agricultural exports.

\*\*\*

Prepared by the World Analysis Branch, International Economics Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators were John C. Dunmore III, Thomas A. Warden, and Thomasine B. McCall. Thelma Carpenter, Fannye G. Lockley, and Mary L. Fant provided statistical support. Editorial support was provided by Linda L. Hatcher, Information Division, Economics Management Staff.

## October-March Exports Down 17 Percent

U.S. agricultural exports fell to \$18.1 billion during the first 6 months of fiscal year 1983 (October 1982-March 1983), 17 percent below those of the same period a year earlier. Exports showed definite signs of improvement in the second quarter after dropping 22 percent below those of the previous year during the first quarter (October-December 1982). Feed grain export prices averaged 10 to 15 percent above those at the beginning of the year. Wheat and flour shipments picked up in January, and soybeans maintained their record pace. In light of these developments, the revised fiscal year 1983 export estimate of \$36.5 billion forecast in March remains attainable.

### Soybeans and Product Exports Rise

A disappointing South American harvest and a competitive price relationship with corn in the European Community continue to benefit soybean and soybean meal exports. Japan, the largest U.S. soybean market abroad, currently is taking 10 to 15 percent more than last year's record 4.3 million tons. East Asia, particularly Taiwan, Korea, and Indonesia, is becoming one of the largest foreign markets for U.S. soybeans. Two million tons were shipped to that area in fiscal year 1982. This growth reflects a shift to more protein feeding in these countries, particularly in the fast-growing poultry industries. While Taiwan absorbs roughly half of this total, Korean and Indonesian imports have grown faster than Taiwan's over the last 5 years.

Mexico has resumed buying significant amounts of U.S. soybeans and soybean meal after a disappointing fall harvest. These purchases were facilitated by a \$1.6-billion credit arrangement between the U.S. Commodity Credit Corporation and the Mexican food import agency. The arrangement also included feed grains and dairy products.

### Feed Grain Exports Drop Slightly

Overall movement of U.S. feed grains has dropped only marginally below last year's pace, even though Europe and the Soviet Union have reduced purchases of feed grains by a third during the past 6 months. Foreign exchange constraints are limiting sales to Eastern Europe, while the Soviets have shifted to other suppliers, and Western Europe is utilizing more protein in feed rations. Corn exports have had good success in East and Southeast Asia and Latin America, and Mexico is bolstering the grain sorghum market.

### Wheat and Rice Exports Fall Sharply

Exports of food grains (wheat and rice) have fallen sharply since fall 1982. Wheat shipments are presently 17 percent below a year ago, and rice shipments are down 36 percent. Canada has been a particularly aggressive competitor for wheat exports, following consecutive record harvests in 1981 and 1982. Argentina also has made gains in the world wheat market

along with the European Community (France). In an effort to maintain its market share, the United States arranged to sell 1 million tons of wheat flour to Egypt, normally the fourth largest market for U.S. wheat and products. U.S. wheat exports to India and Morocco are up sharply from last year; however, shipments to China, the USSR, and most other markets declined.

Rice exports could fall to their lowest level in 7 years, again with the U.S. market share declining. Through March, only 918,000 tons of rice were exported, compared with 1.3 to 1.6 million tons during the previous 3 years. Reduced shipments to Nigeria, Italy, and Iran caused most of this decline.

Cotton Exports  
Down One-Third

Cotton exports received a boost in March with news that the Soviet Union contracted to purchase U.S. cotton. Through March, cotton shipments were a third below those of a year earlier. All the major markets--Japan, Korea, China, and Taiwan--have reduced their imports of U.S. cotton. China, the largest market in fiscal year 1981, cut imports to negligible amounts. This reduction followed two successive bumper harvests in China. (Steve Milmoe, World Analysis Branch)

## October-March Imports Rising With Economic Recovery

U.S. imports of agricultural commodities rose 5 percent to \$8.1 billion in the first 6 months of fiscal year 1983 (October 1982-March 1983), as the U.S. economy began to recover. Most of the increase came from noncompetitive products, particularly coffee. Coffee imports reached 553,000 tons through March, up 7 percent from those of a year earlier. On the minus side, sugar imports are about half of last year's pace. U.S. demand for sugar continues to decline. This decline, along with import quotas, duties, and fees, is expected to reduce sugar imports by about 700,000 tons in fiscal year 1983.

Chocolate processors continued to take advantage of low prices (due largely to the oversupply of world cocoa) for imported cocoa beans and products. Through March, bean imports were 57 percent ahead of those of last year, and imports of cocoa products were ahead 37 percent. U.S. cocoa processors in the past 5 to 10 years have developed facilities in other countries, particularly South America, reducing U.S. cocoa bean imports.

### Meat Imports Rise

Meat imports in January under Public Law 88-482 rose sharply above the levels of the previous 2 months. Voluntary constraints by Canada, Australia, and New Zealand limited imports in November and December 1982. However, some of the meat that would have entered if restraints had not been in effect was placed in bonded warehouses and immediately entered the United States at the beginning of 1983. This meat is primarily fresh or frozen manufacturing grade beef used in hamburger and as filler in other meat products. Quota and nonquota imports currently account for 7 to 8 percent of beef consumption in the United States.

Live cattle imports during October-March 1982/83 were the highest in 3 years largely due to an increase in feeder cattle from Mexico in the fall. U.S. importers of Mexican feeder cattle and Canadian "fat" cattle have paid less in U.S. dollars for the same amount of live cattle due to the movement in the U.S. dollar versus the peso and the Canadian dollar. Pork imports, up about 15 percent, have also risen because of this exchange rate differential and low pork supplies in the United States. Canada supplies 90 to 95 percent of the U.S. fresh pork imports, while Europe provides over 95 percent of the processed pork.

### Orange Juice Imports Jump

The United States imported nearly 330 million gallons of frozen concentrated orange juice in fiscal year 1982, and the pace through March would raise that figure in 1983 significantly. This market has increased tenfold in 6 years mainly due to the variability in Florida's orange production. Approximately 95 percent of Florida's orange crop is processed compared with a

third of the much smaller California crop. Freeze damage reduced Florida's citrus production in 1981 and 1982.

Banana imports--almost exclusively from Latin America--have increased consistently in volume by about 3 percent annually since 1972. Americans ate more bananas than any other fruit. In 1982, 22 pounds were consumed per capita.

Vegetable Imports  
Increase 10 to 15  
Percent

Fresh vegetables--predominantly from Mexico--appeared to be recovering after 2 years of sluggish movement in 1981 and 1982. Fresh tomatoes, cucumbers, eggplant, and peppers arrive mostly during the winter months when U.S. production is at its lowest point. Through March, shipments were up 10 to 15 percent over 1981/82.

Imports of beverages continued their upward trend, with wines and beer 10 and 13 percent, respectively, ahead of last year. From 1972 to 1982, these figures grew by 12 and 20 percent, respectively, per year. (Steve Milmoe, World Analysis Branch)

1/ PRELIMINARY

## U.S. Agricultural Exports to Canada Decline in 1982

Trade between the United States and Canada totaled about \$79 billion in 1982, the highest level of bilateral trade in the world. Both countries view this huge amount of trade positively. However, the border States complain that cash crops and other commodities are moving in from Canada and competing heavily with locally produced products. The continuing strength of the U.S. dollar relative to the Canadian dollar makes it possible for these Canadian items to sell competitively in the northern border States.

Affected firms and individuals claim that the impact of low-priced products is largely regional and not felt widely outside border States, except in the case of lumber. The result is negligible political support for the imposition of trade barriers. Complicating the problem are charges by the lumber, grain, and other U.S. industries that the Canadian Government is unfairly subsidizing various Canadian industries with tax breaks, preferential financing, grants, and labor costs. But the Canadian Government maintains that the subsidies are not unfair, and the country hopes to retain free flow of trade with the United States. An open border is decidedly to Canada's advantage, since 30 percent of Canada's gross national product depends on exports (one of the highest percentages among industrialized nations), and its economy is in a recession worse than that which occurred in the United States.

Trade in agricultural products accounts for only 4 percent of the total intercountry trade. The United States is by far Canada's largest supplier of agricultural products, with over half the total value of Canada's farm imports originating in the United States. The United States is also one of Canada's important customers for agricultural exports; the United States is exceeded only by Japan, the European Community, and more recently, the USSR. Major traded goods in the U.S. market are live animals and meat products.

### Canadian Exports to the United States Increase

Live hogs, pork, and pork products have become especially important exports of Canada in recent years--accounting for the products derived from one in every five hogs produced in the country. In 1982, pork exports climbed 25 percent to 370 million pounds. Shipments to the United States in that year reached 250 million pounds. Exports to Japan also increased somewhat over the 1981 figure. Canada's export sales were boosted by the foot-and-mouth disease outbreak in Denmark, the depressed value of the Canadian dollar, and the less-than-keen demand for pork by Canadian consumers. Canadian hog and pork shipments to the United States and to Japan may continue high in 1983.

Live cattle and beef ranked seventh and eighth of Canada's most important export commodities, and the United States is the major market for both these products. Canada and the United States trade live cattle rather freely, depending on the supply and demand conditions in the North American market. Both countries, however, have fresh and frozen meat import controls. The Canadians voluntarily restrained their shipments of beef in late 1982 as total U.S. imports neared the meat import act trigger level; however, U.S. shipments into Canada did not approach Canada's 1982 maximum allowed level. Neither country expects to reach the critical import level in 1983.

A significant amount of fruits and vegetables, flaxseed, animal feed, furs, and hides and skins also is exported. Total Canadian agricultural exports to the United States reached about C\$1 billion (C\$ = Canadian dollars) in 1979, rose to C\$1.113 billion in 1980, to C\$1.380 billion in 1981, and to C\$1.687 billion in 1982.

U.S. Agricultural  
Exports to Canada  
Decline

U.S. agricultural exports to Canada reached \$2.1 billion by 1981, but dropped to \$1.8 billion in 1982. A further drop to about \$1.7 billion is expected in 1983. The U.S. economy is in a significant recovery in 1983, but a parallel recovery in Canada will likely lag. The worst 12-month period since the Great Depression hit the Canadian economy in 1982. Interest payments on the growing debt take 25 cents from every dollar of Federal income. On a per capita basis, Canada's current budgetary deficit will exceed the worrisome deficit in the United States. Intervention by the central bank has stabilized the Canadian dollar around 81 U.S. cents, an alltime low.

Feed Grains and  
Oilseeds

Canada's excellent 1982 field crop harvest will temper the lagging demand for U.S. agricultural products further. The corn, oats, barley, and rye crops turned out record-high or near-record levels of production. USSR purchases of these coarse grains are off substantially in 1982/83. Partly because of decreased Soviet purchases, supplies of these crops are building up and prices are severely depressed. U.S. corn prices also have dropped, but the cheaper Canadian dollar is causing eastern Canadian feeders to turn increasingly to supplies of feed grains produced within Canada. Also, Canada added a large supply to its feed wheat stocks when an early frost turned 4 to 5 million tons of the 1982 wheat crop into feed grade.

Corn and soybean purchases from the United States promise to be down substantially in 1983. Purchases of Canadian corn by the Soviet Union are off sharply, and the size of Canada's 1982 soybean crop was up 44 percent over the 1981 crop. In the first quarter of fiscal year 1983, U.S. corn exports to Canada decreased 38 percent, and soybean exports declined 24 percent from a year earlier.

## Meat and Poultry

Canadian fed beef output may average above 1982 levels because of large feed grain supplies and lower interest rates. This increase could replace part of the imports of higher quality beef coming from the United States to fill a demand by the Canadian hotel and restaurant trade.

U.S. pork supplies have dropped from their 1981 level, and Canada is maintaining and possibly even increasing its own supplies. Therefore, the net trade in pork is likely to continue favoring Canada. U.S. pork flows north into Canada will continue to decrease in 1983 because of the strength of the U.S. dollar. First quarter exports were only half the shipments of the same quarter a year ago.

Canada employs supply control of poultry and eggs. Therefore, U.S. shipments north of these commodities is small, except when Canadians seriously miscalculate demand.

## Fruits and Vegetables

Total Canadian fruit production in 1982 increased to well above that of both 1981 and 1980, but only slightly above the 1975-79 average. Major vegetable production in 1982 also exceeded that of the previous year. The larger fruit and vegetable supplies point to reduced import demand for these commodities. Difficult economic times and the strength of the U.S. dollar will dampen Canada's demand further for U.S. fruits and vegetables. Hence, this large category of Canadian imports from the United States will add up to less than \$1 billion in 1983, compared with over \$1 billion in 1982. (Pat Weisgerber, North America & Oceania Branch)

## U.S. Agricultural Exports by Region and State, Fiscal Year 1982

U.S. exports of farm products totaled \$39.1 billion during fiscal year 1982, 11 percent below the record \$43.8 billion set in fiscal year 1981. Values declined for feed grains, rice, wheat, cotton, fruits, tree nuts, poultry meat, and tallow.

State shares of U.S. agricultural exports, based primarily on production data, changed in fiscal year 1982 from their 1980/81 patterns. Illinois returned to its customary number one position, followed by Iowa, California, Texas, and Minnesota. Nebraska, Kansas, Indiana, Missouri, and North Dakota rounded out the top 10 States, which accounted for about 55 percent of U.S. farm product exports.

Illinois and Iowa derived more than \$3 billion each from agricultural exports in fiscal year 1982. Illinois ranked first in soybean and feed grain shipments, followed closely by Iowa. California, accounting for over \$2.8 billion, placed first in fruits, vegetables, and tree nuts, and second in cotton and rice exports. Fourth-ranked Texas led all other States in exports of cotton, cattle hides, and tallow, and placed second in live animals and meat. Texas was also a significant exporter of wheat and rice.

This section updates statistics on State shares in the March/April 1982 issue of Foreign Agricultural Trade of the United States. Export shares by State were estimated from various data sources, including Statistical Reporting Service's Crop Reporting Board publications and the 1978 Census of Agriculture. Export values were obtained by multiplying each States' share of farm production by commodity times the total export value for each of the respective commodities. (Thomas A. Warden, World Analysis Branch)

## U.S. Agricultural Exports Under Government-Financed Programs Decline to \$1.3 Billion in 1982

Concessional agricultural exports under U.S. Government-financed programs totaled \$1.27 billion in calendar year 1982, 9 percent less than those in 1981, mainly due to declines in shipments under Public Law (P.L.) 480 Title I sales and Title II donations. In 1982, Government program shipments to over 70 countries accounted for 3 percent the total value of U.S. agricultural exports. Egypt, the leading recipient, took \$431 million, or 34 percent of the total. Bangladesh, the second largest recipient, received \$112 million, about one-half more than in 1981. Other major recipients in 1982 were Pakistan, India, Sudan, Morocco, Peru, Poland, El Salvador, and Indonesia.

Exports under P.L. 480 amounted to \$1,125 million, 11 percent below those of a year earlier. Title I Long-Term Dollar Credit Sales of \$744 million in 1982 declined by 4 percent in value but rose 6 percent in volume compared with 1981. Title I sales accounted for 59 percent of concessional Government-financed programs in 1982. Long-term credit sales went to 29 countries, with Egypt, Bangladesh, Pakistan, Morocco, and Sudan the principal recipients. Wheat, accounting for 55 percent of the value of all Title I sales, rose 9 percent compared with a year earlier. Egypt received most of the wheat, followed by Bangladesh, Morocco, and Sudan. Wheat flour, the second largest commodity under Title I, declined 13 percent in value and 7 percent in volume.

Shipments under Title II donations totaled \$381 million (1.6 million metric tons), a drop of 21 percent in value and 3 percent in volume compared with 1981. Voluntary relief agencies shipped 56 percent of Title II donations, the World Food Program shipped 31 percent, and government-to-government aid programs shipped 13 percent. India was the principal recipient with 23 percent of total Title II donations. Principal commodities under Title II were soybean oil, wheat, wheat products, and blended food products.

Agency for International Development disbursements totaled \$144 million, 11 percent of concessional sales. Egypt got 79 percent of the total, followed by Sudan with 20 percent. Commodities under mutual security aid consisted of wheat, inedible tallow, corn, oilcake and meal, tobacco, soybean oil, seeds, baby chicks, and poultry feed. (Fannye G. Lockley, World Analysis Branch)

## **Japan To Increase Imports of U.S. Grains and Meats**

---

*"I am impressed with the quality and thoroughness of this work. It represents a real contribution to our understanding of Japanese agriculture."*

Fred Sanderson, Guest Scholar, Brookings Institution.

---

Japan has long been one of the most important markets for U.S. agricultural exports, especially grains and oilseeds. A new report by USDA's Economic Research Service, *Japan's Feed-Livestock Economy: Prospects for the 1980's*, helps explain why that has been so and why future farm exports to Japan will probably rise even higher.

Each year, Japan purchases about 20 percent of total U.S. corn exports, 50 percent of U.S. sorghum exports, and more than 20 percent of U.S. soybean exports. By 1990, the United States may be able to increase its grain and soybean exports by a third and quintuple its beef exports, according to William Coyle, author of the report. In contrast, the Japanese market for imported dairy products, pork, and poultry will show little or no growth. The United States provides more than 65 percent of Japan's imports of coarse grains (corn, barley, sorghum), 95 percent of its soybean imports, and 71 percent of its soybean meal imports.

The report includes extensive tables and charts on Japanese consumption, production, and trade of beef, dairy, poultry, fish, and feed grains, including projections through 1990.

*Japan's Feed-Livestock Economy: Prospects for the 1980's* (William T. Coyle; \$5; 80 pages, stock no. 001-000-04316-1) can be purchased from Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. GPO pays the postage.

For faster service, call GPO's order desk, (202) 783-3238, and charge your purchase to your VISA, MasterCard, or GPO Deposit account. Bulk discounts are available.
